· For patients with chronic herpes simplex virus infections, pretreatment with antiviral medications should be initiated, especially when lesions appear in the site to be treated. Antiviral treatment typically begins 1 day prior to treatment and continues for a total of 5-7 days.

Informed Consent

1. I _____duly authorize_____
and other specially trained associate technicians of this facility, to perform treatments using the V-FORM handpiece.
2. I am hereby undertaking the responsibility of the treatment outcome.
3. I hereby commit to inform about any change in my medical and health condition.
4. I do not suffer from Herpes / I suffer from Herpes and I agree to initiate preventive treatment with antiviral medications, though I am aware that preventive treatment does not ensure total prevention of Herpes appearance during the treatment.
5. I understand the procedure is purely elective and that studies indicate that results vary with each individual according to skin condition and physiological attributes as well as the medical condition of the client.
6. I understand that a commitment to a series of treatments is required to achieve optimal results and I am aware that the treatment may be performed by different Taylor Drive Facial Aesthetics LLC personnel.
7. I consent that Taylor Drive Facial AestheticsLLC may discontinue the treatment course at any time without prior notice.
8. I consent to photographs for the purpose of monitoring response to treatment and for use in medical education research of Taylor Drive Facial Aesthetics LLC as long as my anonymity is maintained and my privacy protected.

9. I hereby declare that I was informed in regards to the following:

9.1 The versatile treatments available with the V-FORM handpiece are based on RF technology, implemented in medical applications for over 3 decades. RF utilizes different frequencies flowing through the skin with the purpose of heating the dermis and hypodermis layers. The heat promote the production of collagen fibers which are the main proteins in the skin responsible for skin elasticity and resilience thereby contributing to a healthier and flexible skin. In addition, RF induced heat increases stored fat break down. Although results can be seen after initial treatment it is necessary for the cumulative effect to adhere to a series of treatments as per the practitioner's discretion. I am aware that multiple treatments are necessary to achieve optimum results. The treatment is non-invasive.

9.2 I have been advised of the expected results as well as the possible risks and side effects of the treatment which may include local pain, erythema, edema, itching and sensitivity to touch, urticaria, purpura or ecchymosis, hematoma, allergic contact dermatitis to the glycerin, bruise, blister, burn, hyper- and hypo-pigmentation. All side effects are transient and mild, however in the event of adverse side effects the treating personnel must be informed and a physician consult may be necessary.

My questions regarding this procedure have been answered to my satisfaction.
I accept all risks of treatment and agree to provide aftercare as directed by this facility.
